GitHub: <https://github.com/imswag99> • Portfolio: <https://swagat-portfolio.vercel.app>

Professional Summary

Self-taught full-stack developer specializing in the MERN stack, with practical experience building real-world web applications through self-driven projects. Proficient in developing RESTful APIs, designing responsive React interfaces, and implementing authentication and authorization systems. Focused on building scalable, efficient applications while continuously refining development practices and learning modern technologies.

Education

Bachelor of Computer Applications (BCA) Assam, India	2019 – 2022
Higher Secondary (XII) Assam, India	2016 – 2018
High School (X) Assam, India	2015 – 2016

Projects

TaskPilot – MERN Project Management SaaS

GitHub: <https://github.com/imswag99/mern-saas-project-management>

Live: <https://mern-project-management-saas.vercel.app/>

- Architected and deployed a full-stack MERN project management platform enabling teams to create projects, manage tasks, and collaborate in real time.
- Implemented JWT-based authentication with role-based access control for secure project and task management.
- Developed a Kanban-style workflow with drag-and-drop task management, priority levels, dynamic labels, and task assignments.
- Integrated real-time updates using Socket.IO to synchronize task changes across connected users.
- Built scalable REST APIs with optimized MongoDB queries and aggregation pipelines.
- Deployed frontend on Vercel and backend on Render with environment-based configuration and cross-origin API communication.

MindTrace – MERN Knowledge Decay Tracker

GitHub: <https://github.com/imswag99/mern-knowledge-decay-tracker>

Live: <https://mern-knowledge-decay-tracker.vercel.app/>

- Built a full-stack MERN application for tracking knowledge retention and analyzing learning decay patterns.
- Designed a custom time-difficulty based algorithm to model knowledge decay behavior.
- Optimized backend performance using indexed MongoDB collections and efficient query structures.
- Implemented dynamic data visualization with interactive charts for real-time retention analysis.
- Improved UI responsiveness using optimized React state management and Framer Motion animations.
- Deployed frontend on Vercel with a modular REST API architecture.

E-DUCATE – Django Learning Management System

GitHub: <https://github.com/imswag99/django-mini-lms>

- Built a responsive e-learning platform enabling instructors to create and manage courses with structured lessons.
- Implemented secure user authentication with role-based access for students and instructors.
- Developed Django models, views, and REST endpoints to manage courses, lessons, and user enrollment.
- Designed a review and rating system enabling students to provide feedback on course quality.
- Styled the application using Tailwind CSS to create a clean, responsive interface.
- Managed version control and project documentation using Git and GitHub.

Technical Skills

Frontend: React.js, Tailwind CSS, JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, Django

Database: MongoDB, MySQL

Tools and Technologies: Git, GitHub, JWT Authentication, REST APIs, Vercel
